

## List of Journals Hyperlinked from IPAP Online Journals

| Publisher  | Journal name                 | Publisher                 | Journal name               |
|--|------------------------------|---------------------------|----------------------------|
| The Institute of Pure and Applied Physics (IPAP)             | Jpn. J. Appl. Phys.          | Elsevier                  | J. Cryst. Growth           |
|  | J. Phys. Soc. Jpn.           |                           | Thin Solid Films           |
|  | Prog. Theor. Phys. Suppl.    |                           | Appl. Surf. Sci.           |
|  | Prog. Theor. Phys.           |                           | Surf. Sci.                 |
| The Japan Institute of Metals (JIM)                          | Mater. Trans., JIM           |                           | Solid State Commun.        |
|  |                              |                           |                            |
| The American Institute of Physics (AIP)                      | J. Appl. Phys.               |                           | Opt. Commun.               |
|  | Appl. Phys. Lett.            |                           | Chem. Phys. Lett.          |
|  | J. Chem. Phys.               |                           | Comput. Phys. Commun.      |
|  | J. Math. Phys.               |                           | J. Phys. Chem. Solids      |
|  | J. Vac. Sci. & Technol. A    |                           | J. Non-Cryst. Solids       |
|  | J. Vac. Sci. & Technol. B    |                           | Nucl. Phys. B Proc. Suppl. |
|  | Sov. Phys JETP               |                           | Nucl. Phys. A              |
|  | JTP JETP Lett.               |                           | Nucl. Phys. B              |
| The American Physical Society (APS)                          | Phys. Rev. A                 |                           | Nucl. Phys.                |
|  | Phys. Rev. B                 |                           | Phys. Lett. A              |
|  | Phys. Rev. C                 |                           | Phys. Lett. B              |
|  | Phys. Rev. D                 |                           | Phys. Lett.                |
|  | Phys. Rev. E                 |                           | Ann. Phys.                 |
|  | Phys. Rev. ST Accel. Beams   |                           | Physica A                  |
|  | Phys. Rev. Lett.             |                           | Physica B                  |
|  | Rev. Mod. Phys.              |                           | Physica C                  |
|  |                              |                           | Physica D                  |
|  |                              |                           | Physica E                  |
| Institute of Physics (IoP)                                   | J. Opt. A                    |                           | Phys. Rep.                 |
|  | J. Opt. B                    |                           |                            |
|  | J. Opt.                      |                           |                            |
|  | Pure Appl. Opt.              | e-print                   | astro-ph                   |
|  | Quantum Semiclass. Opt.      |                           | cond-mat                   |
|  | J. Phys. A                   |                           | gr-qc                      |
|  | J. Phys. B                   |                           | hep-ex                     |
|  | J. Phys.: Condens. Matter    |                           | hep-lat                    |
|  | J. Phys. C                   |                           | hep-ph                     |
|  | J. Phys. D                   |                           | hep-th                     |
|  | J. Phys. E                   |                           | math-ph                    |
|  | J. Phys. F                   |                           | nucl-ex                    |
|  | J. Phys. G                   |                           | nucl-th                    |
|  | Nonlinearity                 |                           | quant-ph                   |
|  | Nanotechnology               |                           | quant-ph                   |
|  | Plasma Phys. Control. Fusion | American Chemical Society | J. Phys. Chem. A           |
|  | Plasma Source Sci. Technol.  |                           | J. Phys. Chem. B           |
|  | Semicond. Sci. Technol.      |                           | J. Phys. Chem.             |
| Supercond. Sci. Technol.                                     |                              | J. Am. Chem. Soc.         |                            |
| J. High Energy Phys.   | Wiley                        | Phys. Status Solidi A     |                            |
| Europ. J. Phys.  |                              | Phys. Status Solidi B     |                            |
| Class. Quant. Grav   |                              | Phys. Status Solidi C     |                            |
| The Institute of Electrical and Electronics Engineers (IEEE) | IEEE Trans. Electron Devices | Springer                  | Appl. Phys. A              |
|  | IEEE Electron Device Lett.   |                           | Appl. Phys. B              |
|  | IEEE J. Quantum Electron     | Springer                  | Phys. Status Solidi C      |
|  |                              |                           | Appl. Phys. A              |
|  |                              |                           | Appl. Phys. B              |
